

## CKE-4MR collimator target sight

The CKE-4MR target sight is intended for directing the gunfire of the ZU-23-2MR anti-aircraft naval set as well as 23 mm naval gun ZU-23-2M.

The target sight is used for firing 23 mm guns as well as 9K32M anti-aircraft close range guns for fighting against flying targets moving with high speed and maneuvering.

The CKE-4MR enables combating moving and motionless targets in the air, on the ground or at the sea.

It is additionally equipped with emergency aiming system - ringed-shaped (rakurs) target sight, which enables continuous combating in case of a breakdown of the basic aiming system.

### Basic tactical and technical data

Optical system magnifying power	1x
Executable angle of allowance	0 ÷ 18°
Executable aiming angle	0 ÷ 1,5°
Range of distances entered:	
■ by means of the manual switch	4, 10 kbl
■ by means of the switch pedal	7 kbl
Power supply	12 ± 2 V
Sight weight	≤ 14,5 kg
